

This is Helpers/api_endpoints.js from the frontend repo. You will have to go into this file and replace all the api endpoints with live endpoints if you decide to redeploy the AWS configuration, as the api endpoints will certainly change.

the lambda functions that you must connect apis to are listed. so for each lambda function, create an api endpoint of the appropriate type (as according to the **api tutorial**) and update the link.

```
let apis = { // triggers lambda function: ChangeSponsorshipsInfo
ChangeSponsorshipInfo: 'https://thuv0o9tga.execute-api.us-east-1.amazonaws.com/dev/updatesponsorshipinfo',

// triggers lambda function: ChangeUserInfo ChangeUserInfo:
'https://u902s79wa3.execute-api.us-east-1.amazonaws.com/dev/saveuserdetails',

// triggers lambda function: CreateUser CreateCognitoIdentity:
'https://t4jjmnr8e5.execute-api.us-east-1.amazonaws.com/dev/createuser',

// triggers lambda function: createNewSponsorship CreateNewSponsorship:
'https://nrpwjk1iz1.execute-api.us-east-1.amazonaws.com/dev/createnewsponsorship',

// triggers lambda function: CreateOrder CreateOrder: 'https://jbcqty2yxb.execute-api.us-east-1.amazonaws.com/dev/createorder',

// triggers lambda function: GetAllUserData GetAllUserData:
'https://wdukos3oed.execute-api.us-east-1.amazonaws.com/dev/getalluserdata',

// triggers lambda function: sponsorList GetAllSponsorData:
'https://2cw17jd576.execute-api.us-east-1.amazonaws.com/dev/sponsorlist',

// triggers lambda function: appList GetApplicationsBySponsor:
'https://unmqgiwf1a.execute-api.us-east-1.amazonaws.com/dev/applist?Username=',

// triggers lambda function: GetCatalogItems GetCatalogItems:
'https://bfv61oiy3h.execute-api.us-east-1.amazonaws.com/dev/getcatalogitems?SponsorID=',

// triggers lambda function: DriverDataBySponsor GetDriverDataBySponsor:
'https://rb6nqfuvvg.execute-api.us-east-1.amazonaws.com/dev/driverdatabysponsor?SponsorUsername=',

// triggers lambda function: GetEbayItemsByIDs GetEbayItemsByIDs:
'https://emdjjz0xd8.execute-api.us-east-1.amazonaws.com/dev/getebayitemsbyproductids',

// triggers lambda function: GetItemsFromEbay GetItemsFromEbay:
'https://0hcub33ona.execute-api.us-east-1.amazonaws.com/dev/ebay',

// triggers lambda function: GetOrder GetOrder: 'https://45mkccncmi.execute-api.us-east-1.amazonaws.com/dev/getorder',

// triggers lambda function: GetOrganizationNames GetOrganizationNames:
'https://asellofio4.execute-api.us-east-1.amazonaws.com/dev/getorganizationnames',

// triggers lambda function: GetOrgSponsors GetOrgSponsors:
'https://xggw415uwe.execute-api.us-east-1.amazonaws.com/dev/getorgsponsors?Organization='
```

```
// triggers lambda function: GetOrgUserData GetOrgUserData:
'https://xggw415uwe.execute-api.us-east-1.amazonaws.com/dev/getorguserdata?
Organization=',

// triggers lambda function: getPointHistoryBySponsorship (getPointHistoryBySponsorshi
in exported lambda functions) [ don't mind the typo :) ] GetPointHistoryBySponsorship:
'https://b428t56xa7.execute-api.us-east-
1.amazonaws.com/dev/getpointhistorybysponsorship',

// triggers lambda function: GetSponsorshipDetails GetSponsorshipDetails:
'https://8mhdaeg2kl.execute-api.us-east-1.amazonaws.com/dev/getuserdetails',

// triggers lambda function: GetUsernames GetUsernames: 'https://hym6oy13e9.execute-
api.us-east-1.amazonaws.com/dev/getusernames',

// triggers lambda function: checkTest SendCheckoutEmail: 'https://mws12vm3.execute-
api.us-east-1.amazonaws.com/dev/checkoutEmail',

// triggers lambda function: SetCatalogItems SetCatalogItems:
'https://4hw5o2emwe.execute-api.us-east-1.amazonaws.com/dev/setcatalogitems',

// triggers lambda function: SetOrder SetOrder: 'https://t1nrlz2fl4.execute-api.us-
east-1.amazonaws.com/dev/setorder',

// triggers lambda function: SubmitApp SubmitApplication: 'https://z8yu8acjwj.execute-
api.us-east-1.amazonaws.com/dev/submitapplication',

// triggers lambda function: UpdateOrgName UpdateOrgName: 'https://waza1dohpl.execute-
api.us-east-1.amazonaws.com/dev/updateorgname',

// triggers lambda function: UpdateSponsorshipPointRatio (UpdateSponsorshipPR in
exported functions) UpdateSponsorshipPDR: 'https://q8z2hne254.execute-api.us-east-
1.amazonaws.com/dev/updatesponsorship',

// triggers lambda function: UserSignup UserSignup: 'https://thuv0o9tga.execute-
api.us-east-1.amazonaws.com/dev/saveuserdetails', }

export default apis
```
